

COVID-19 Update for March 16, 2022

(updated at 10:00 on 3/16/22)

The Chautauqua County Health Department will no longer report weekly COVID-19 case numbers. Due to a community shift to rapid testing resources, we are only aware of a fraction of cases occurring in the community. Please see the trusted resources listed below to monitor case, death, and hospitalization data for Chautauqua County.

Persons Currently Hospitalized in County due to COVID or COVID complications [^]	7-Day Average % Positive*	CDC COVID-19 Community Level
2	1.2%	LOW

[^]This number includes people currently hospitalized in Chautauqua County facilities due to COVID-19, and does not include residents who are hospitalized outside of Chautauqua County

COVID-19 Community Levels

CDC looks at the combination of three metrics — new COVID-19 admissions per 100,000 population in the past 7 days, the percent of staffed inpatient beds occupied by COVID-19 patients, and total new COVID-19 cases per 100,000 population in the past 7 days — to determine the COVID-19 community level. New COVID-19 admissions and the percent of staffed inpatient beds occupied represent the current potential for strain on the health system. Data on new cases acts as an early warning indicator of potential increases in health system strain in the event of a COVID-19 surge.

Using these data, the COVID-19 community level is classified as low, medium, or high.
